DOURO RIVER ESTUARY

CHANGES BETWEEN THE 50'S AND NOW

Pollution in the Douro River

Becoming aware of the problem

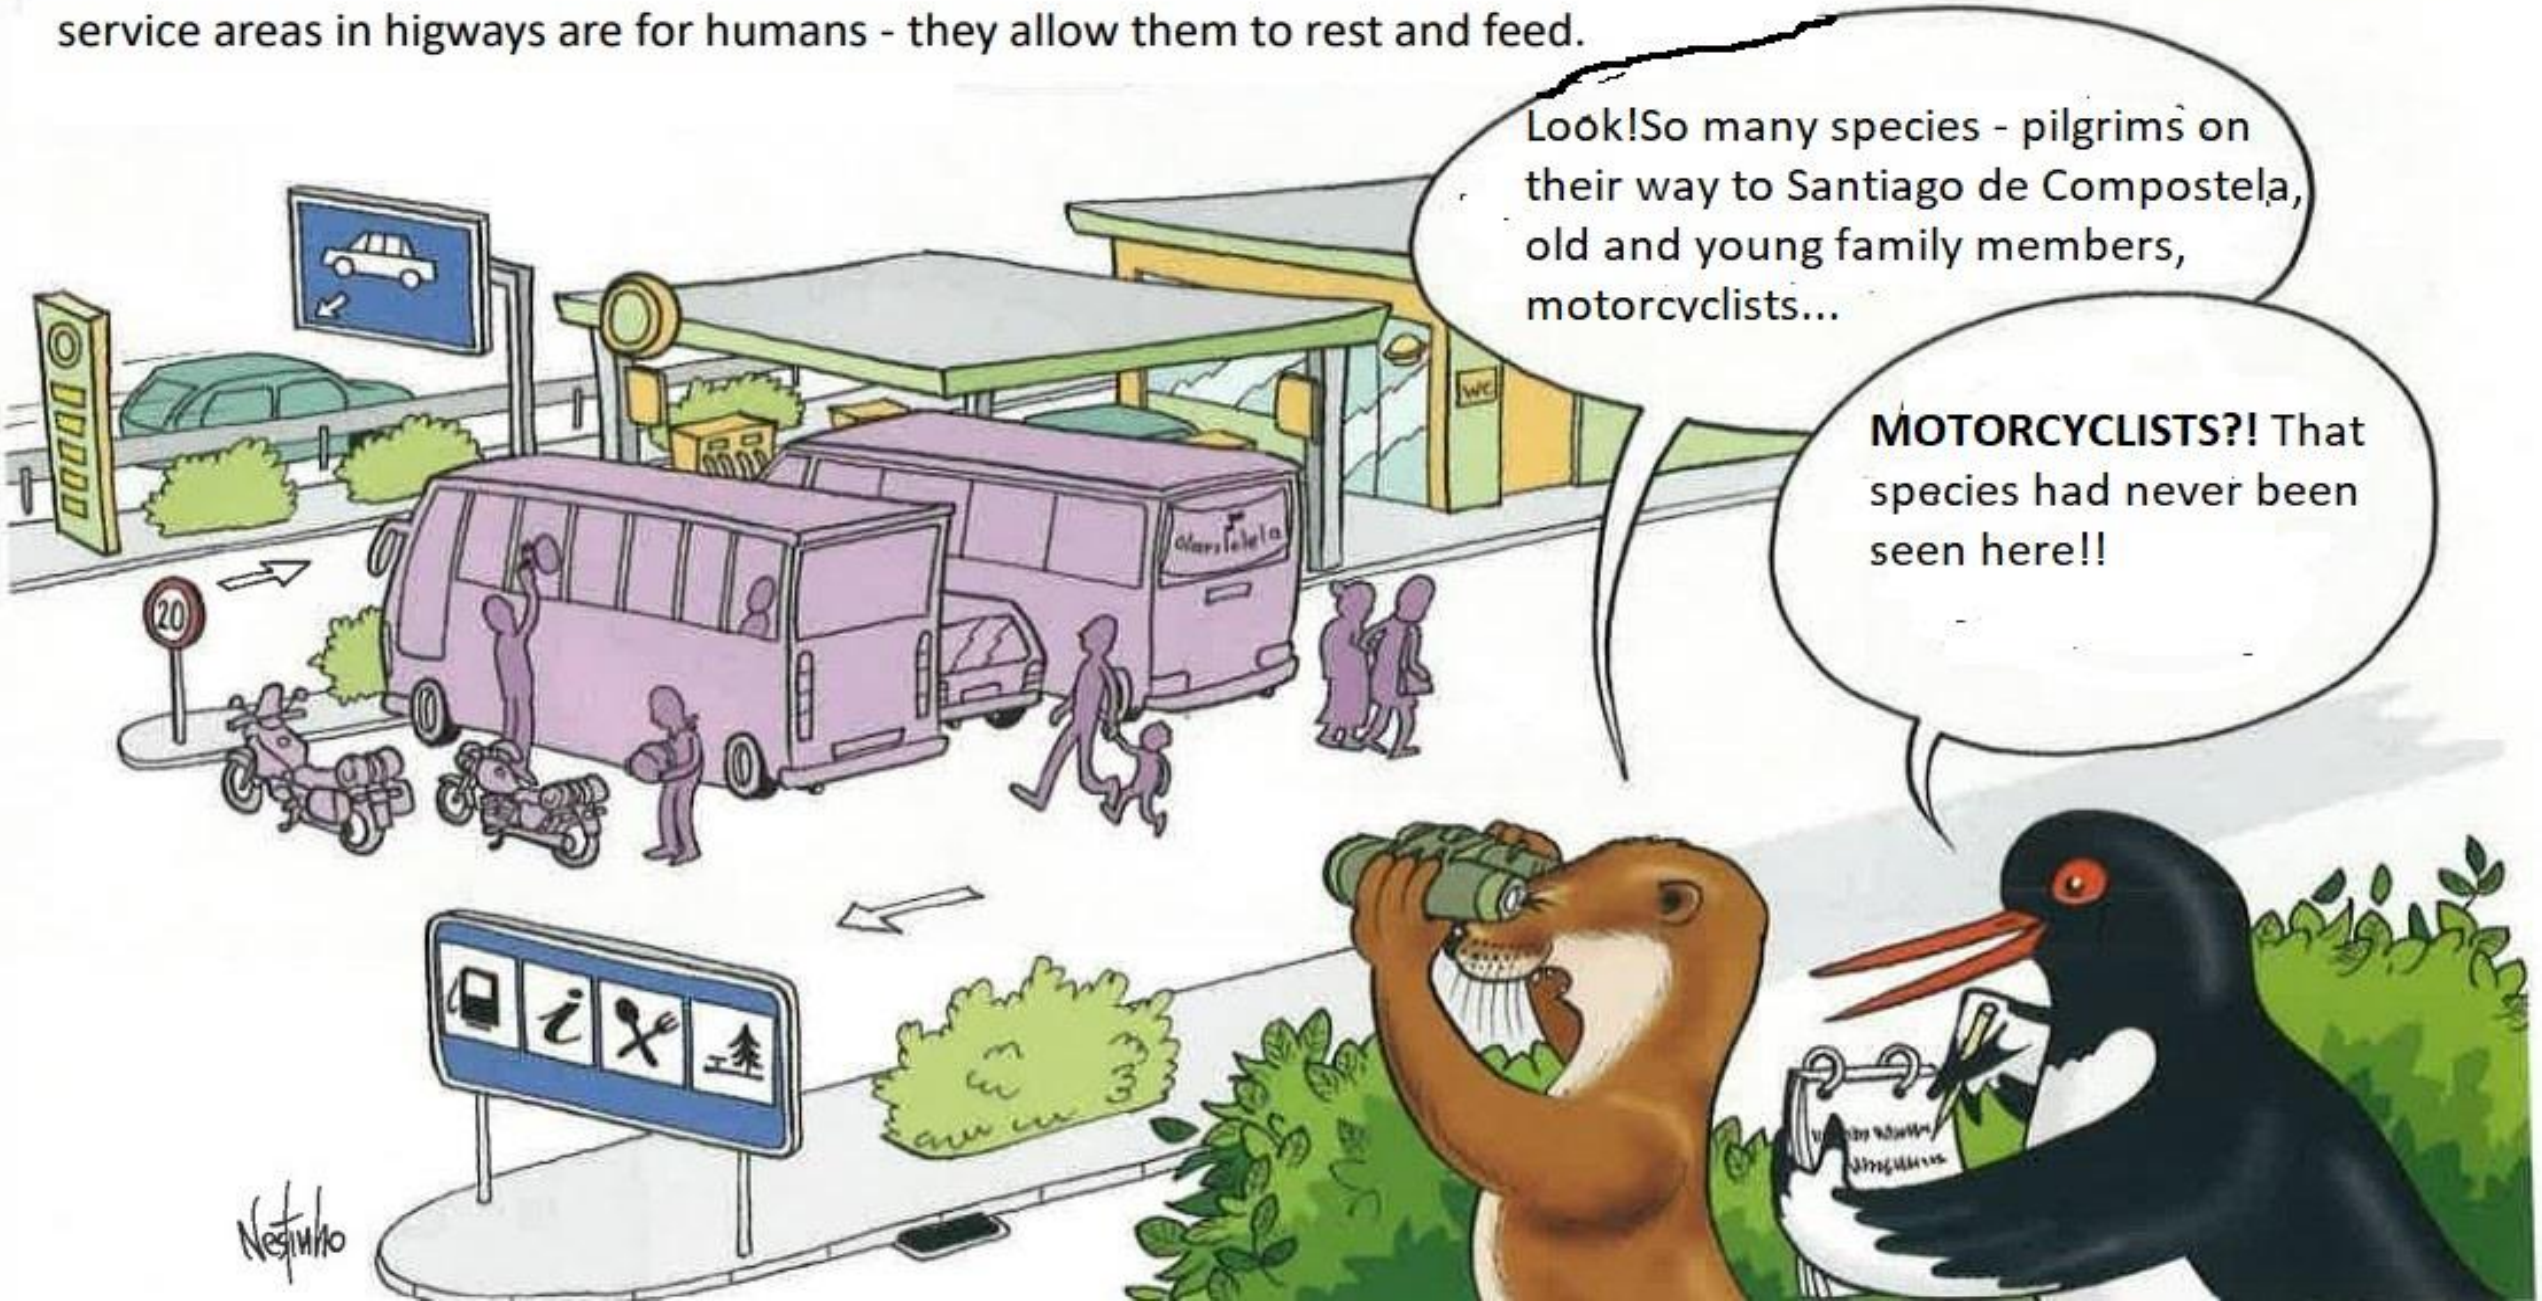
https://arquivos.rtp.pt/conteudos/despoluicao-do-douro/

Cleaning the wastewater: a modern sewage farm

The Estuary is again alive.

The estuaries and coastal lagoons are as important for the animals as the

service areas in higways are for humans - they allow them to rest and feed.



ONE PLACE, TWO ECOSYSTEMS

- A fresh water ecosystem;
- And a saltmarsh one.

FAUNA

Weasel

Water Lizard

Mallard

Some animals and birds to be seen all year round

Kingfisher
